UIDAI ties up with MapmyIndia to display authorised Aadhaar Centres in Mappls App

The facility will be available in coming months and help people locate nearest authorised Aadhaar Centres and check available services

Posted On: 02 APR 2026 1:16PM by PIB Delhi

The Unique Identification Authority of India (UIDAI) has signed an agreement with MapmyIndia to enable the display of authorised Aadhaar centres on their Mappls App, a move which will enhance convenience for residents, in coming months.

The move is expected to help people to identify and access authorised Aadhaar centres and help residents identify Aadhaar Centres based on the nature of services offered, like adult enrolment, child enrolment or only address and mobile update.

The collaboration is designed to enhance public convenience, combat misinformation, and ensure residents have seamless access to state-of-the-art Aadhaar Seva Kendras (ASKs) and other Aadhaar centres, nationwide. The agreement was signed on Wednesday, 1 April 2026.

"UIDAI is always driven by resident centricity. This kind of collaboration will allow digital mapping of verified Aadhaar Centres across India and help people find the authorised Aadhaar centres easily," said Sh. Bhuvnesh Kumar, CEO UIDAI.

Once it's rolled out in next couple of months, it will ensure that when users search on Mappls App they are directed to authorised Aadhaar centres. MapmyIndia shall integrate UIDAI-provided Aadhaar Centre information into the Mappls platform and ensure accurate representation, digital mapping and distinct listing of Aadhaar centres.

"It is a privilege to serve UIDAI and enable people with easy access to Aadhaar Centres, through the Mappls App," said Rakesh Verma, Co-founder and CMD, MapmyIndia.
