

PRESS NOTE

Ministry of Electronics and IT Government of India

New Delhi, March 25, 2026: Ministry of Electronics and Information Technology (MeitY), participated in the 33rd edition of *Convergence India 2026*—a premier technology and innovation exhibition platform from March 23 – 25, 2026 with the aim to showcase key Digital Public Infrastructure (DPI) initiatives that are transforming service delivery across the country.

Designed on the theme **“Empowering Citizens and Businesses through Digital Public Infrastructure”**, the MeitY pavilion showcased flagship digital platforms developed under Digital India such as DigiLocker, Entity Locker and UMANG. The initiatives were showcased through interactive displays, experiential zones, LIVE demos on services, Use-case driven storytelling for real-life impact and Assisted walkthroughs for visitors

The Unified Mobile Application for New-age Governance (UMANG) showcased how a single platform is providing access to multiple government services, with focus on mobile-first governance and citizen convenience. DigiLocker, a secure cloud-based platform for storing, sharing, and verifying documents exhibit highlighted how it is enabling paperless governance and reducing administrative burden while Entity Locker, a digital document wallet for organizations and businesses spotlighted how it is facilitating secure storage and sharing of official documents thereby supporting ease of doing business through digital verification.

The MeitY pavilion was visited by Government officials, industry stakeholders, startups, academic institutions, students and general public.

MeitY’s participation in *Convergence India 2026* served as a strategic platform to demonstrate the impact of Digital Public Infrastructure in enabling seamless governance, improving citizen experience and fostering digital inclusion.
