Press Release

MeitY Showcases Digital Public Infrastructures at NCeG 2026, Jaipur, Rajasthan | July 1 – 2, 2026

The Ministry of Electronics and Information Technology (MeitY) showcased its flagship Digital Public Infrastructure (DPI) platforms– **DigiLocker, Entity Locker, API Setu, APAAR and UMANG** at the **29th National Conference on e-Governance (NCeG 2026)** held at the Rajasthan International Centre, Jaipur.

The exhibition witnessed enthusiastic participation from government officials, public sector organizations, academic institutions, industry representatives and citizens. Visitors interacted with domain experts to understand how these platforms are enabling secure, paperless, and citizen-centric digital service delivery.

DigiLocker received appreciation from departments already using the platform, while many organizations explored opportunities for onboarding and expanding digital document services. **EntityLocker** and **API Setu** generated strong interest among departments seeking secure document management and API-based digital integration solutions.

The **UMANG** team demonstrated the extensive range of government services available through the platform, resolved citizen queries and engaged with departments to identify additional Rajasthan Government services for integration.

APAAR emerged as one of the key attractions, with parents, educators and institutions showing keen interest in understanding its role in maintaining students' lifelong academic records and simplifying access to verified educational credentials.

The exhibition highlighted MeitY's continued commitment to strengthening Digital Public Infrastructure, promoting seamless service delivery and accelerating digital transformation across government ecosystems.
